

Docket No.: 21736-00010-US

## <u>AMENDMENTS TO THE CLAIMS</u>

Claims 53-86 are cancelled.

Claim 87 (new) A computer-implemented system for auctioning a plurality of items, at least some of said items being dissimilar, said system comprising:

- a) an auctioneer's system and at least two user systems, the auctioneer's system communicatively coupled to user systems;
  - b) said user systems including:
- b1) means for receiving messages from the auctioneer's system and for displaying those messages;
  - b2) means for receiving bid related information from users; and
- b3) means for transmitting bid information to the auctioneer's system, said bid information including bids (S<sub>i</sub>, P<sub>i</sub>) each comprising a set identification S<sub>i</sub> and a value parameter P<sub>i</sub>, where the set identification S<sub>i</sub> identifies a set of items that the user proposes to transact and where the value parameter P, specifies a value proposed by the user for the set of items identified by S; and
  - c) said auctioneer's system including:
- cl) means for generating and transmitting messages to user systems, said messages including a non-final message indicating that an auction will continue and a final message indicating that an auction has terminated;
  - c2) means for receiving bid information from user systems; and
- c3) decision means responsive to the bid information received from the user systems for determining whether an auction should continue or terminate, said decision means including:
- selecting means which selects bids to maximize a function of the c31) value parameters P, of the selected bids;

Application No.: 09/476,877 Docket No.: 21736-00010-US

means to initiate the generation of a non-final message to at least c32) one user system in response to a determination to continue an auction; and

c33) means to initiate the generation of a final message to at least one user system in response to a determination to terminate an auction.

Claim 88 (new) A system as recited in claim 87 wherein the selecting means constrains the selection such that the sets Si identified by the selected bids are disjoint.

Claim 89 (new) A system as recited in claim 88 wherein the items comprise television licenses or associated derivative rights.

Claim 90 (new) A system as recited in claim 88 wherein the auction is conducted in multiple rounds.

A system as recited in claim 90 wherein the decision means compares the sum of the parameters P i from the selected bids to a function of the sum of the parameters  $P_i$  from the selected bids of an earlier round.

Claim 92 (new) A system as recited in claim 88 which further includes means for limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 93 (new) A system as recited in claim 88 which further includes means for limiting the number of bids that may be entered by a particular user.

Claim 94 (new) A system as recited in claim 88 which further includes means for limiting bids to identifying particular sets of said plurality of items.

Docket No.: 21736-00010-US

Claim 95 (new) A system as recited in claim 88 which further includes means for limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 96 (new) A system as recited in claim 88 which further includes means for limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 97 (new) A computer-implemented system for auctioning dissimilar items, including multiple instances of each of plural dissimilar items, said system comprising:

- an auctioneer's system and at least two user systems, the auctioneer's system communicatively coupled to user systems;
  - b) said user systems including:
- b1) means for receiving messages from the auctioneer's system and for displaying those messages;
  - b2) means for receiving bid related information from users; and
- b3) means for transmitting bid information to the auctioneer's system, said bid information including bids (Si, Pi) each comprising a set identification Si and a value parameter P<sub>i</sub>, where the set identification S<sub>i</sub> identifies a set of items that the user proposes to transact and where the value parameter P<sub>i</sub> specifies a value proposed by the user for the set of items identified by S<sub>i</sub>; and
  - c) said auctioneer's system including:

Docket No.: 21736-00010-US

- c1) means for generating and transmitting messages to user systems, said messages including a non-final message indicating that an auction will continue and a final message indicating that an auction has terminated;
  - c2) means for receiving bid information from user systems; and
- c3) decision means responsive to the bid information received from the user systems for determining whether an auction should continue or terminate, said decision means including:
- selecting means which selects bids to maximize a function of the value parameters  $P_i$  of the selected bids subject to the constraint that the sets  $S_i$  identified by the selected bids are compatible:
- c32) means to initiate the generation of a non-final message to at least one user system in response to a determination to continue an auction; and
- means to initiate the generation of a final message to at least one user system in response to a determination to terminate an auction.

Claim 98 (new) A system as recited in claim 97 wherein the items comprise television licenses or associated derivative rights.

Claim 99 (new) A system as recited in claim 97 wherein the auction is conducted in multiple rounds.

A system as recited in claim 99 wherein the sets  $S_i$  identified by Claim 100 (new) the selected bids in the final round of the auction indicate items that will be assigned to the respective users after the auction.

Docket No.: 21736-00010-US

Claim 101 (new) A system as recited in claim 99 wherein the decision means compares the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P<sub>i</sub> from the selected bids of an earlier round.

Claim 102 (new) A system as recited in claim 97 which further includes means for limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 103 (new) A system as recited in claim 97 which further includes means for limiting the number of bids that may be entered by a particular user.

Claim 104 (new) A system as recited in claim 97 which further includes means for limiting bids to identifying particular sets of said plurality of items.

Claim 105 (new) A system as recited in claim 97 which further includes means for limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 106 (new) A system as recited in claim 97 which further includes means for limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 107 (new) A computer-implemented method for auctioning a plurality of items, at least some of said items being dissimilar, among a plurality of users comprising:

a) providing an auctioneer's system;

Docket No.: 21736-00010-US

- receiving bid related information from users and transmitting bid information to b) the auctioneer's system, said bid information including bids (Si, Pi) each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$  identifies a set of items that the user proposes to transact and where the value parameter P, specifies a value proposed by the user for the set of items identified by S.;
- determining at the auctioneer's system, in response to the bid information c) received from users, whether the auction should continue or terminate, said determining including the selecting of bids to maximize a function of the value parameters  $P_i$  of the selected bids;
- d) transmitting a message indicating that the auction will continue to at least one user, in response to a determination to continue the auction; and
- transmitting a message indicating that the auction will terminate to at least one e) user, in response to a determination to terminate the auction.

Claim 108 (new) A method as recited in claim 107 wherein the determining further includes constraining the selection such that the sets S<sub>i</sub> identified by the selected bids are disjoint.

Claim 109 (new) A method as recited in claim 108 wherein the items comprise television licenses or associated derivative rights.

Claim 110 (new) A method as recited in claim 108 wherein the auction is conducted in multiple rounds.

Docket No.: 21736-00010-US

Claim 111 (new) A method as recited in claim 110 wherein the determining further includes comparing the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P<sub>i</sub> from the selected bids of an earlier round.

Claim 112 (new) A method as recited in claim 108 which further comprises limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 113 (new) A method as recited in claim 108 which further comprises limiting the number of bids that may be entered by a particular user.

Claim 114 (new) A method as recited in claim 108 which further comprises limiting bids to identifying particular sets of said plurality of items.

Claim 115 (new) A method as recited in claim 108 which further comprises limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 116 (new) A method as recited in claim 108 which further comprises limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 117 (new) A computer-implemented method for auctioning a plurality of items, at least some of said items being dissimilar, among a plurality of users comprising:

a) providing an auctioneer's system;

Docket No.: 21736-00010-US

- receiving bid related information from users and transmitting bid information to the auctioneer's system, said bid information including bids (Si, Pi) each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$  identifies a set of items that the user proposes to transact and where the value parameter  $P_i$  specifies a value proposed by the user for the set of items identified by S.;
- c) determining at the auctioneer's system, in response to the bid information received from users, whether the auction should continue or terminate, said determining including the selecting of bids to maximize a function of the value parameters  $P_i$  of the selected bids subject to the constraint that the sets S, identified by the selected bids are compatible;
- d) transmitting a message indicating that the auction will continue to at least one user, in response to a determination to continue the auction; and
- e) transmitting a message indicating that the auction will terminate to at least one user, in response to a determination to terminate the auction.

Claim 118 (new) A method as recited in claim 117 wherein the items comprise television licenses or associated derivative rights.

Claim 119 (new) A method as recited in claim 117 wherein the auction is conducted in multiple rounds.

Claim 120 (new) A method as recited in claim 119 wherein the sets S<sub>i</sub> identified by the selected bids in the final round of the auction indicate items that will be assigned to the respective users after the auction.

Docket No.: 21736-00010-US

Claim 121 (new) A method as recited in claim 119 wherein the determining further includes comparing the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P<sub>i</sub> from the selected bids of an earlier round.

Claim 122 (new) A method as recited in claim 117 which further comprises limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 123 (new) A method as recited in claim 117 which further comprises limiting the number of bids that may be entered by a particular user.

Claim 124 (new) A method as recited in claim 117 which further comprises limiting bids to identifying particular sets of said plurality of items.

Claim 125 (new) A method as recited in claim 117 which further comprises limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 126 (new) A method as recited in claim 117 which further comprises limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 127 (new) A system for conducting a computer-implemented auction of a plurality of items, at least some of said items being dissimilar, said system including a plurality

Docket No.: 21736-00010-US

of user systems operated by users and an auctioneer's system, the auctioneer's system being communicatively coupled to a plurality of user systems, comprising:

- a) means for receiving bid information, said bid information including bids  $(S_i, P_i)$  each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$  identifies a set of items that the user proposes to transact and where the value parameter  $P_i$  specifies a value proposed by the user for the set of items identified by  $S_i$ , from users at a plurality of user systems;
- b) means for transmitting signals based on the bid information from user systems to the auctioneer's system; and
- c) means for determining, based on the signals, the items to be assigned to the users, said determining means including selecting means which selects bids to maximize a function of the value parameters P<sub>i</sub> of the selected bids.

Claim 128 (new) A system as recited in claim 127 wherein the selecting means constrains the selection such that the sets S<sub>i</sub> identified by the selected bids are disjoint.

b

Claim 129 (new) A system as recited in claim 128 wherein the items comprise television licenses or associated derivative rights.

Claim 130 (new) A system as recited in claim 128 wherein the auction is conducted in multiple rounds.

Claim 131 (new) A system as recited in claim 130 wherein the determining means compares the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P<sub>i</sub> from the selected bids of an earlier round.

Docket No.: 21736-00010-US

Claim 132 (new) A system as recited in claim 128 which further includes means for limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 133 (new) A system as recited in claim 128 which further includes means for limiting the number of bids that may be entered by a particular user.

Claim 134 (new) A system as recited in claim 128 which further includes means for limiting bids to identifying particular sets of said plurality of items.

Claim 135 (new) A system as recited in claim 128 which further includes means for limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

A system as recited in claim 128 which further includes means for Claim 136 (new) limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

A system for conducting a computer-implemented auction of Claim 137 (new) dissimilar items, including multiple instances of each of plural dissimilar items, said system including a plurality of user systems operated by users and an auctioneer's system, the auctioneer's system being communicatively coupled to a plurality of user systems, comprising:

means for receiving bid information, said bid information including bids (Si, Pi) each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$ identifies a set of items that the user proposes to transact and where the value parameter P<sub>1</sub>

Docket No.: 21736-00010-US

specifies a value proposed by the user for the set of items identified by S, from users at a plurality of user systems;

- means for transmitting signals based on the bid information from user systems to b) the auctioneer's system; and
- means for determining, based on the signals, the items to be assigned to the users, c) said determining means including selecting means which selects bids to maximize a function of the value parameters P<sub>i</sub> of the selected bids subject to the constraint that the sets S<sub>i</sub> identified by the selected bids are compatible.

Claim 138 (new) A system as recited in claim 137 wherein the items comprise television licenses or associated derivative rights.

Claim 139 (new) A system as recited in claim 137 wherein the auction is conducted in multiple rounds.

Claim 140 (new) A system as recited in claim 139 wherein the sets S<sub>i</sub> identified by the selected bids in the final round of the auction indicate items that will be assigned to the respective users after the auction.

Claim 141 (new) A system as recited in claim 139 wherein the determining means compares the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters  $P_i$  from the selected bids of an earlier round.

Claim 142 (new) A system as recited in claim 137 which further includes means for limiting bids from a particular user based on previous bidding activity by said particular user.

Docket No.: 21736-00010-US

Claim 143 (new) A system as recited in claim 137 which further includes means for limiting the number of bids that may be entered by a particular user.

Claim 144 (new) A system as recited in claim 137 which further includes means for limiting bids to identifying particular sets of said plurality of items.

Claim 145 (new) A system as recited in claim 137 which further includes means for limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 146 (new) A system as recited in claim 137 which further includes means for limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 147 (new) A method for conducting a computer-implemented auction of a plurality of items, at least some of said items being dissimilar, in a system including an auctioneer's system, the method comprising:

- receiving bid information from users, said bid information including bids (S, P,) each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$ identifies a set of items that the user proposes to transact and where the value parameter P; specifies a value proposed by the user for the set of items identified by  $S_i$ ;
  - transmitting signals based on the bid information to the auctioneer's system; and b)

Docket No.: 21736-00010-US

determining, based on the signals, the items to be assigned to the users, said c) determining including the selecting of bids to maximize a function of the value parameters P, of the selected bids.

Claim 148 (new) A method as recited in claim 147 wherein the determining further includes constraining the selection such that the sets S<sub>i</sub> identified by the selected bids are disjoint.

Claim 149 (new) A method as recited in claim 148 wherein the items comprise television licenses or associated derivative rights.

Claim 150 (new) A method as recited in claim 148 wherein the auction is conducted in multiple rounds.

Claim 151 (new) A method as recited in claim 150 wherein the determining further includes comparing the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P<sub>i</sub> from the selected bids of an earlier round.

Claim 152 (new) A method as recited in claim 148 which further comprises limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 153 (new) A method as recited in claim 148 which further comprises limiting the number of bids that may be entered by a particular user.

Claim 154 (new) A method as recited in claim 148 which further comprises limiting bids to identifying particular sets of said plurality of items.

Docket No.: 21736-00010-US

Claim 155 (new) A method as recited in claim 148 which further comprises limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Claim 156 (new) A method as recited in claim 148 which further comprises limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

A method for conducting a computer-implemented auction of Claim 157 (new) dissimilar items, including multiple instances of each of plural dissimilar items, in a system including an auctioneer's system, the method comprising:

- receiving bid information from users, said bid information including bids (Si, Pi) a) each comprising a set identification  $S_i$  and a value parameter  $P_i$ , where the set identification  $S_i$ identifies a set of items that the user proposes to transact and where the value parameter P; specifies a value proposed by the user for the set of items identified by  $S_i$ ;
  - transmitting signals based on the bid information to the auctioneer's system; and b)
- determining, based on the signals, the items to be assigned to the users, said c) determining including the selecting of bids to maximize a function of the value parameters P, of the selected bids subject to the constraint that the sets S<sub>i</sub> identified by the selected bids are compatible.

Claim 158 (new) A method as recited in claim 157 wherein the items comprise television licenses or associated derivative rights.

Application No.: 09/476,877 Docket No.: 21736-00010-US

Claim 159 (new) A method as recited in claim 157 wherein the auction is conducted in multiple rounds.

A method as recited in claim 159 wherein the sets S<sub>i</sub> identified by Claim 160 (new) the selected bids in the final round of the auction indicate items that will be assigned to the respective users after the auction.

A method as recited in claim 159 wherein the determining further Claim 161 (new) includes comparing the sum of the parameters P<sub>i</sub> from the selected bids to a function of the sum of the parameters P; from the selected bids of an earlier round.

Claim 162 (new) A method as recited in claim 157 which further comprises limiting bids from a particular user based on previous bidding activity by said particular user.

Claim 163 (new) A method as recited in claim 157 which further comprises limiting the number of bids that may be entered by a particular user.

Claim 164 (new) A method as recited in claim 157 which further comprises limiting bids to identifying particular sets of said plurality of items.

Claim 165 (new) A method as recited in claim 157 which further comprises limiting a bid from a particular user to a value parameter no less than a minimum value, wherein said minimum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.

Docket No.: 21736-00010-US

DI

Claim 166 (new) A method as recited in claim 157 which further comprises limiting a bid from a particular user to a value parameter no greater than a maximum value, wherein said maximum value is specific to said particular user and to a particular set identified, and depends on previous bids by the users.
